### Basic Skills: Fact Families

Math facts for the number family of 6.

6 and 0	5 and 1	4 and 2	3 and 3	2 and 4	1 and 5	0 and 6
$6 + 0 =$ 6	$5 + 1 =$ 6	$4 + 2 =$ 6	$3 + 3 =$ 6	$2 + 4 =$ 6	$1 + 5 =$ 6	$0 + 6 =$ 6

Sum in each cell above is 6, so they are called number family of 6. But  $2 + 3$  is not number family of 6, as  $2 + 3 = 5$  and not 6.

Example: Pick the fact that does NOT belong in the family of 6.

	Add	Not in family
• $5 + 1$	$5 + 1 = 6$	
• $2 + 3$	$2 + 3 = 5$	$2 + 3 = 5$
• $2 + 4$	$2 + 4 = 6$	
• $3 + 3$	$3 + 3 = 6$	

**Answer:**  $2 + 3 = 5$  Basic Skill: Practice

**A:** Pick the fact that does NOT belong in the family of 4.

<input type="radio"/> $2 + 2$	$2 + 2 = 4$	
<input type="radio"/> $4 + 0$	$4 + 0 = 4$	
<input type="radio"/> $3 + 1$	$3 + 1 = 4$	
<input type="radio"/> $5 + 0$	$5 + 0 = 5$	$5 + 0 = \underline{\quad}$

**Answer:**  $5 + 0 = \underline{\quad}$

**B:** Pick the fact that does NOT belong in the family of 10.

<input type="radio"/> $2 + 8$	$2 + 8 = 10$	
<input type="radio"/> $4 + 0$	$4 + 0 = 4$	
<input type="radio"/> $3 + 7$	$3 + 7 = 10$	
<input type="radio"/> $5 + 5$	$5 + 5 = 10$	$\underline{\quad} + \underline{\quad} = \underline{\quad}$

**Answer:**  $\underline{\quad} + \underline{\quad} = \underline{\quad}$
