

Independent Practice 2: Determining Surface Area and Volume of Rectangular Solids

Determine the surface area and volume of the rectangular solids. (All dimensions are in cm)

<p>1.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>	<p>2.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>	<p>3.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>	<p>4.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>
<p>5.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>	<p>6.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>	<p>7.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>	<p>8.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>
<p>9.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>		<p>10.</p>  <p><math>V = \underline{\quad}</math> <math>SA = \underline{\quad}</math></p>
